STUDENT LEADERSHIP AND MULTICULTURAL PROGRAMS

STUDENT LEADERSHIP OVERVIEW

The Student Administrative Council is comprised of seven student members that provide training, guidance, and support to both student clubs and Student Leaders working in the six collective branches.

The Student Fee Board (SFB) allocates student funds in a responsible manner to enhance student life and opportunities on campus. It values transparency and seeks to network with the staff, faculty, and students to ensure that the best and most comprehensive decisions are made.

Universal Technology Fee dollars are collected from each student and allocated for technology related projects and programs that serve the student body.

Service and Activity Fees are used primarily for extracurricular activities, tutoring around campus that support student learning and achievement, and programs that build community.

The General Fund is available for use year-round. General Fund requests must benefit student life on campus and is primarily used for clubs, unexpected expenses, and one-time purchases.

The Student Administrative Council (SAC) advocates for the student body by working with faculty, staff and administration to ensure that student needs and concerns are addressed. SAC also provides leadership and daily support to the Student Fee Board, the Arts, Lectures, & Activities Board, the Student Cabinet, the Research and Advocacy Board, the Communications Board, and Student Clubs. The SAC Chair presents initiatives to the campus community, represents Student Leadership at all-college events, and supports each coordinator to ensure the success of each board.

The Student Cabinet (CAB) members represent the student body by serving on key campus committees that shape policy and procedures impacting all students. Currently, Student Cabinet members serve on 14 committees across campus. The Student Cabinet meets weekly to report on the work of their committees. Sharing information helps identify common concerns, initiatives and efforts of various committees, thus promoting and deepening cross-campus collaboration.

The Communications Board (CB) promotes programs and activities that increase student engagement, build community, reflect values of diversity, and foster a rich intellectual, educational and cultural campus life. Students create marketing plans, implement social media strategies, and manage all promotions for Student Leadership.

The Research and Advocacy **Board** (RAB) reaches out to students to understand their needs and concerns, then provide the tools necessary for students to advocate for higher education concerns with legislators in Olympia. While anyone is encouraged to speak directly at any time to any member of the Student Administrative Council, members of the Research and Advocacy Board will also be specifically tasked with researching student concerns and working with SAC's Research and Advocacy Coordinator.

The Arts, Lectures, and Activities Board (ALA) plans and implements programs and activities that promote student engagement, build community, reflect values of diversity, and foster a rich intellectual, educational and cultural campus life. Students create and support lectures, films and workshops as well as musical, theater and comedy performances. The program serves as a resource to support faculty and others wishing to bring speakers and special events to a campus-wide audience.

sonal and cultural campus life. Students arketing plans, implement social rategies, and manage all promotions ent Leadership.

Student Clubs and affinity groups are created each year by communities of students with shared, common interests. The SAC Student Club Coordinator assists with planning events, distributing promotional materials, and managing operations for

all approved clubs on campus.
